## Classification of Flood Risk

### **Flood Level Information**

You are advised that the property subject to this license is located on flood liable land identified as being in a **Medium/High Flood Risk Precinct**. Surveyed ground levels of the property and buildings to AHD (Australian Height Datum) should also be obtained. This information along with the 1% AEP (Annual Exceedance Probability) and PMF (Possible Maximum Flood) flood levels extracted from the Lake Illawarra Floodplain Risk Management Plan dated January 2012 will enable you to determine the effect/depth of flooding, if any, on this property.

It should also be noted that flood level increases due to climate change and ocean level rise may be applicable to any development on the subject property.

### **Flood Policies**

For information on Council's requirements for development on flood affected lands, you are advised that this information is contained in Council's Wollongong Development Control Plan 2009 and the NSW Government's Floodplain Development Manual 2005. These documents are available in Council's Reference Library on Level 1 of the Council Administration Building in Burelli Street, Wollongong and Wollongong DCP 2009 is also available on Council's web site. Alternatively you may wish to engage the services of a Consulting Civil Engineer who will advise you of your development opportunities.

### **Disclaimer**

Council does not warrant the accuracy of the information provided by Council. A suitably qualified professional engineer should be engaged to assist in the interpretation of the information provided by Council.

## Prior Approval Required

As per notice given above, **prior** approval of Council for the installation of a relocatable home or associated structure on a dwelling site is required in accordance with Clause 74 of the Local Government (Manufactured Home Estates, Caravan Parks, Camping Grounds and Moveable Dwellings) Regulation, 2005.

## Classification of Bush Fire Risk

The land is recorded in Council's records as bushfire prone land. Consideration should be given to the requirements of the New South Wales Rural Fire Services guidelines for developments within bushfire prone areas

## Access to Approval and Community Map

The holder of an approval to operate a caravan park or camping ground must ensure that copies of the following documents are readily available for inspection without cost in a location in the caravan park or camping ground specified in the approval for the caravan park or camping ground:

- a) The approval for the operation of a caravan park or camping ground,
- b) The current community map,
- c) A copy of the current Local Government (manufactured home estates, caravan parks, camping grounds and moveable dwellings) Regulation 2005

A copy of the current community map must also be displayed in a prominent position in the caravan park or camping ground.

### **Acid Sulphate Soils**

Council's records indicate that the site is affected by Acid Sulphate Soils and further investigations are necessary in the event of any work involving the disturbance of natural ground

### **Coastal Zone**

The site is identified as being located in a coastal zone and may be affected by future tidal inundation. Further investigations should be carried out on the probable impact of tidal inundation when considering a proposal to install a moveable dwelling on an existing site located within the caravan park

### **Disability (Access to Premises – Buildings ) Standards 2010**

The above standard came into force on the 1<sup>st</sup> May 2011 and makes reference 4 or more single dwellings located on the same allotment and are used for short term holiday accommodation.

The standard should be examined in detail to avoid unnecessary circumstances for the potential for litigation being taken against the holder of the approval to operate a caravan park
